Response to Angier Police Department Flock Case Log

Mayor, Town Commissioners,

Each of us shares a desire to keep the town safe, without using unnecessary tools or violating residents' rights. However, we should agree on the data and what that requires. **The log provided to us by Chief Thomspon on October 6th should cast doubt on the effectiveness of the cameras, when weighted against the existing and potential harms.**

If Angier's Flock cameras are paid for by Angier taxpayers, **they should be used to solve crimes committed in Angier.**

If Angier's Flock cameras are to be worth the expense, they should be used to solve crimes that are worth the estimated (as we are awaiting a public records response) **$60,000-70,000 that Angier has spent on them over the past two years, and will spend in the future.**

We estimate that Angier's cameras take an average of 200,000 images per month. Based on the October 6th, 2026 log that Chief Thompson handed us - crimes where Flock contributed to solving the crime, there were 38 total cases in the past two years. This means that the **vast majority of cases (approximately 1,000 over the past two years)** do not have any Flock involvement, and **the vast majority of images being taken are of innocent drivers.**

Weighing that against the record, of the 38 cases in the Chief's list, only 21 were committed in Angier.

Of those 21, only 11 clearly indicate an arrest or charge, considered "solved", although no note of guilt nor innocence is included.

Of those 11, only 3 solved cases would likely be considered "serious" (One bank robbery, one stolen care, one check fraud)

Of those 3, only 2 were solved with Angier cameras over two years.

This means that for the money we spend, Angier Flock cameras solve only 1 serious crime per year.

That money can be easily spent in ways that do not violate citizens' rights, create a surveillance state, and share our data with over 3,000 police officers in the tri-state area, including the Harnett County Sheriff's Department, that has already fired a detective for abuse.

Flock enforcement: Estimated felony crimes committed in Angier and solved with Angier Flock cameras in 2 years, per police logs.

25-00215 - On 8/6/25, Officer took a report of check fraud at SECU. The suspect vehicle was identified via flock cameras. This lead to multiple felony charges across several jurisdictions.

25-00259 - On 9/15/25, officers were following up on a report that was taken previously for a stolen vehicle in town. The officers received a Flock notification that the stolen vehicle was entering town. Officers located and recovered the stolen vehicle and arrested the driver without incident.

Flock enforcement: Estimated felony crimes committed in Angier and solved with Any Flock Camera in 2 years, per police logs.

25-00206 - On 7/31/25, Officers responded to an armed robbery at SECU. Suspect vehicle and tag were identified through bank surveillance footage, and the tag was entered into the Flock network. We were notified by Raleigh PD that they had officers responding to a bank robbery with the same suspect description. Within four hours of our bank robbery, the suspect vehicle was located and stopped by NC Highway Patrol from a Flock hit in Henderson, NC. FBI took over the case, and the suspect was prosecuted in Federal Court.
